## PROFILE

Medicom Health Interactive, creators of EVALIA® Health Engagement Solutions, develops evidence-based health and wellness software applications that identify at-risk populations through a series of concise questions related to lifestyle, family history, and health. Each program is a customizable, web-based application designed to provide clients with consumer information, educate at-risk populations, and position their organizations as health and wellness leaders.

We recognize that our remarkable success is due to the commitment of employees in servicing our customers and building market leadership through innovation. This commitment has been instrumental in building lasting relationships with hospitals, clinics, and health care systems.

## PURPOSE

**Provide high value to our clients through engaging health and wellness products.**
