

## Software Engineer

*Medicom Health Interactive (MHI) is an award-winning developer of patient engagement software. Our customers are some of the most well-known hospitals, clinics and health care systems in the country. We are a leader in design and cutting-edge health technology and have been recognized as one of the 100 Best Companies to Work for in Minnesota and one of the Fast 50 (fastest growing companies in the Twin Cities).*

We have embarked on a tremendous growth initiative and are seeking an eager software engineer with lots of potential. You will work with our engineering team to support and build world-class solutions in the medical industry to meet the needs of both clients and internal users. You will get your hands on a variety of technologies including Ruby on Rails, Angular, Java, and Amazon Web Services so you should be flexible and excited to learn new things. You will have the chance to make a huge difference on a small, but effective team of engineers in an exciting field.

**Job Title:** Software Engineer

### **Job Duties and Responsibilities:**

- Develop software solutions for websites and mobile devices,
- Design software solutions based on specifications provided
