Product Architect/Software Analyst

Job Description:

The Product Architect/Software Analyst is a key member of the Product Development Team and is primarily responsible for creating and maintaining products for the Health Risk Assessment and other software platforms. Key responsibilities include the design, development, and documentation of the Company's products. This role is an individual contributor positions but works collaboratively with other departments in the Company. This position reports to the Product Manager.

Essential Duties and Responsibilities:

- Architect product improvements and new features by documenting requirements, creating content, wireframing, and/or defining logic diagrams & flow charts
- Create or refine new product concepts for testing and/or development
- Serve as a product expert for various audiences including product training
- Maintain comprehensive product documentation for clients, marketing, and QA, including references and citations for medical claims
- Perform other activities as assigned

Education and/or Experience Requirements:

- Bachelor's degree (B.S.) from a four-year college or university; or two years related experience and/or training; or equivalent combination of education and experience in a health specific field
- 1-2 years of experience and familiarity with the software development lifecycle (SDLC) and experience working in one or more software development methodologies
- 1-2 years of experience creating consumer facing healthcare software is preferred
- Ability to work independently and collaboratively
- Excellent interpersonal and communication skills
